myBlueprint describes Education Planner as a comprehensive education and career/life planning program for grades 7-12 and post-secondary. It lists five Who Am I assessments, a high-school course planner that can show eligibility for every post-secondary pathway in Canada against province-specific graduation requirements, post-secondary and career search (including apprenticeships, programs and occupations), resume and portfolio tools, and budgeting and job-search tools. Most students get access through their school or district, not through a public account we can offer.
