Lab-report planner (for the free LaTeX template)

Outline a lab report before you write: question, methods, results, discussion and references. Pairs with the free LaTeX starting file on this site.

NAME

CITATION STYLE MY COURSE NAMED

OUTLINE

Section	What I will include	Figures or tables	Citations to add
Abstract			
Introduction			
Materials and methods			
Results			
Discussion			
Conclusion			
References			
Appendix / raw data			

BEFORE I COMPILE

- [ ] Headings match the course outline
- [ ] No patient, classmate or confidential identifiers in the data
- [ ] Figures have captions and units
- [ ] I will adapt the .tex file to the required headings, not the other way around

The LaTeX file at /professional/lab-report-template.tex is a starting structure only. It is not a university's official thesis or lab class file.
